1440Security

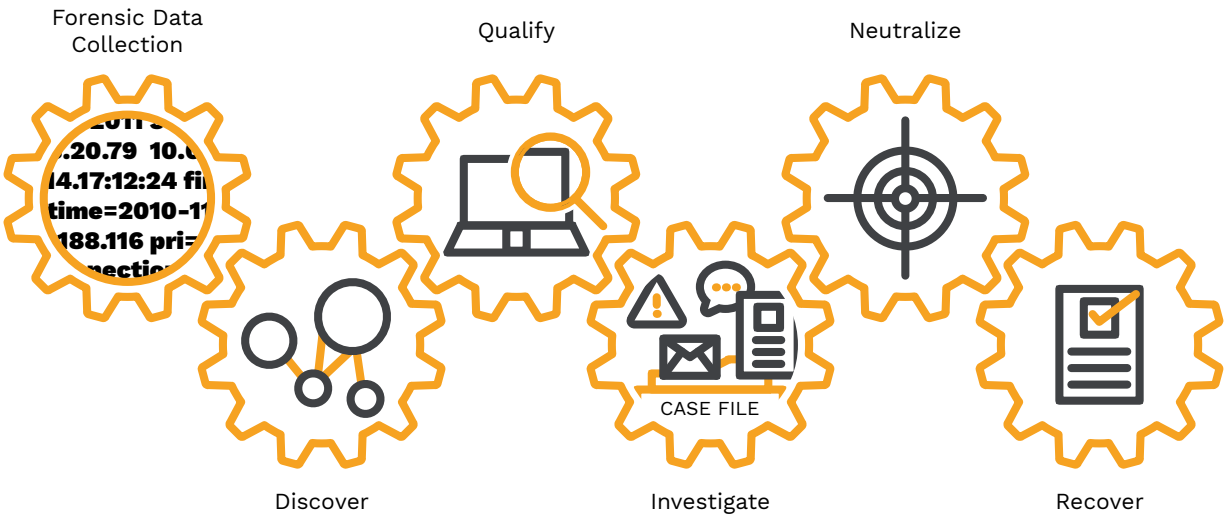
1440 Security Every Minute℠ Managed SIEM

We Analyze Security Event Data in Real Time to Detect and Respond to Cyberthreats

When cyberattacks are targeting your organization, speed and precision matter. 1440 Security's Every Minute℠ Managed Security Information and Event Management (SIEM) solution operates as your organization's central nervous system to alert and enact countermeasures when a threat is looming.

Our managed security information and event management solution delivers far more than just gathering log data and surfacing alarms. As your network traffic and complexity increases, threat and compliance issues call for real-time alerting, correlation, analysis and auditing that can only be accomplished with SIEM technology and a dedicated and certified team of IT experts.

What Should You Look for In a Managed SIEM Service?



1440 Security's Managed SIEM service is designed to scale with your organization's security needs without costly integrations or customizations. We deliver real-time visibility, intelligence, automation and efficiencies across your entire IT environment to protect your business!

1440 Security's Every Minute℠ Managed SIEM includes flexible options that provide customers with various choices in matching their needs with the security and compliance services that we deliver.

1440Security

1440 Security Every Minute℠ Managed SIEM

Every Minute℠ Evidence Locker (SIEM)

Automates the collection and monitoring of logs across a network including firewalls, switches, servers, domain controllers and hundreds of applications, and stores them in a secure research and forensics platform. This Security Intelligence Platform has state-of-the-art machine-based security analytics to detect and notify 1440's Security Analysts of potentially malicious activity. Chain of custody is maintained to protect audit trails against any unauthorized modifications and Logs are retained to meet various compliance requirements including PCI and HIPAA.

- Log management and retention to meet applicable compliance objectives
- High fidelity round-the-clock managed threat identification for critical security events
- Daily and weekly security event, management, and compliance reports
- Access to industry leading SIEM (LogRhythm or Splunk) for research and forensics
- Network monitoring and deep packet inspection (optional)
- File Integrity Monitoring (optional)
- Monthly review of alerts, reports, and system performance
- Full or co-management and maintenance of Threat Detection platform including upgrades, system maintenance & performance tuning, and alarm tuning
- Custom use cases, custom reports, and custom log parsing upon request
- Customer portal and dashboard for daily activity, weekly and monthly management reporting
- Quarterly Executive Business Review
- On demand audit support

Every Minute℠ Threat Detection (SIEM)

Provides real-time analytics and advanced correlation to identify suspicious or malicious activity in your enterprise. Our trained Security Analysts have eyes-on-glass 24x7x365 to evaluate real time security event notifications, weed out false positives, and deliver high fidelity round-the-clock managed threat identification according to your individual escalation policy.

- Round-the-clock Managed Threat Detection & Incident Response
- High fidelity threat identification with our OnTarget Threat Detection Methodology
- Real-time threat assessment and investigation resulting in high quality actionable events
- Daily and weekly security event and management reports
- Custom use case implementation, custom reports, and custom parsing upon request
- Full or co-management and maintenance of Threat Detection platform including upgrades, system maintenance & performance tuning, and alarm tuning
- Customer portal and dashboard for daily activity, weekly and monthly management reporting
- Quarterly Executive Business Review
- On demand audit support

About 1440 SECURITY

We help organizations protect and secure their infrastructure and mission critical data from advanced cyberattacks. With our depth of cyber security expertise, Every Minute℠ monitoring and cyber threat detection we help remove complexity from security operations while providing our clients with the most comprehensive real-time cyber threat defense.
